

The *Reduction of Hazardous Substances* (RoHS) – EU Directive 2002/95/EC restricts the use of certain substances in electrical or electronic equipment sold or used in the European Union after July 1, 2006.

These substances are:

- Lead
- Hexavalent Chromium
- Mercury
- Cadmium
- Polybrominated Biphenyl (PBB)
- Polybrominated Diphenyl Ether (PBDE)

Crystal Technology, Inc. is sensitive to issues impacting our environment and proactively seeks opportunities to improve its environmental performance. As part of this we have been taking the necessary steps to ensure full RoHS compliance across all product lines.

While many of our acousto-optic and RF amplifier products are used in applications that are exempt from this directive, Crystal Technology is developing RoHS versions that if not already available, will be shortly.

All Lithium Niobate (LiNbO₃) product lines are RoHS compliant.

If you would like to obtain more information regarding our RoHS program, please contact one of our qualified sales representatives.
